

C Representative externally supported candidates

Candidate	Prediction	Grade	External evidence
Florhydral Rank 13	Mean pIC50 = 4.250 Min pIC50 = 3.660	A	Direct olfactory-receptor antagonist: inhibits OR2W1/OR51E1/OR51I2/OR51L1 responses to hexanoic acid; sensory tests showed suppression of fatty-acid malodors.
Benzyl tetrahydropyran Rank 27	Mean pIC50 = 4.189 Min pIC50 = 3.687	B	3-Benzyl-tetrahydropyran (CID 12284886) is the subject of a malodor-counteracting patent with headspace analyses and sensory scores for isovaleric acid/nonenal and damp-dry malodor.
8-(sec-Butyl)quinoline Rank 2	Mean pIC50 = 4.307 Min pIC50 = 3.714	C	6/8-sec-butylquinoline is explicitly listed in a patent for compositions that limit or eliminate perception of sweat malodor.

Representative hits are the highest-ranked examples of grades A, B, and C.
